

CONTENTS

FOREWORD	Dr Malcolm Mackay A.M., B.A., B.D., PhD	i
ACKNOWLEDGEMENTS		iv
INTRODUCTION	YOU AND YOUR PART	1
<p>What you need when you are lost – A Map – A Diary – A Guide – Relatives and Friends – A Roster – You and the Patient – Action Sheet.</p>		
SECTION A	THE PATIENT AND BRAIN INJURY	8
CHAPTER 1		9 - 15
BRAIN INJURY – WHAT IS IT?		
<p>Head Injury or Brain Injury? – Types of Head Injury – Why the Brain Gets Injured – Types of Brain Injury – The Initial Damage – The Secondary Damage – The Intracranial Pressure – Extradural Haemorrhage – Subdural Haemorrhage – Intracerebral Haemorrhage.</p>		
CHAPTER 2		16 - 21
MEASURING THE PATIENT'S CONDITION AND WHAT IT MEANS		
<p>Coma – The Glasgow Coma Scale – Motor Response – Eye-opening – Pupil Size – Vocal Response – Age – Other Important Factors – Coming Out of Coma.</p>		
CHAPTER 3		22 - 24
WHAT HAPPENS IN INTENSIVE CARE?		
<p>The Tubes Attached to the Patient – The Breathing Tube – The Feeding Tube – The Intravenous Lines – The Intra-cranial Monitor – The Catheter – The Tubes in the Chest – Drugs.</p>		
CHAPTER 4		25 - 30
THE THINGS THAT CAN'T BE CHANGED AND THE THINGS THAT CAN BE CHANGED		
<p>Fixed Factors – The Primary Brain Injury – The Age of the Patient – Non-Fixed Factors – The Micro-environment – The Macro-environment – The Changing Problem – How our Brain Works – The Cybernetic Loop – Sensory Deprivation.</p>		
SECTION B	COLD BRAIN - HOT BRAIN AND THE APPROACH DISTANCES	31
CHAPTER 5		32 - 35
THE TWO BRAINS		
<p>Inputs to the Brain – Outputs from the Brain – The Hot Brain Track – The Cold Brain Track.</p>		

CHAPTER 6		36 - 41
	THE APPROACH DISTANCE	
	The First Approach Distance – The Second Approach Distance – Threats to Personal Space – How the Brain-injured’s Personal Space is Threatened – Why the Brain-injured’s Personal Space is Threatened.	
CHAPTER 7		42 - 46
	SAFEGUARDING THE APPROACH DISTANCE FOR THE PATIENT	
	The Protective Notice – How the Patient Attempts to Safeguard Approach Distance – What the Patient may do with Intruding Devices – What the Patient may also do as a Safeguard – What to do about Sedation – Restraint – Tubes – Inhibition Plasters – Action Sheet.	
SECTION C	ASSESSING THE PATIENT	47
CHAPTER 8		48 - 54
	IS THE PATIENT STILL IN COMA?	
	The Exploration – What to do? – Your First Job – The Four Possible Awareness States of the Patient – The Fragile Period – Have You Authority to Assess the Patient? – Meeting the Authorities.	
CHAPTER 9		55 - 70
	THE QUESTIONNAIRE TO FIND OUT THE STATE OF THE PATIENT	
	Introduction – The organisation of the Questionnaire – Prognosis – Vigilance – Emotion – Drive – Visual Function – Auditory Function – Tactile Function – Motor Assessments – Hand Function – Vocalization – Swallowing – Chart 1 Sensory Functions – Chart 2 Motor Functions.	
CHAPTER 10		71 - 76
	THE DAWN OF AWARENESS	
	Introductory Statement – Your Attitude – Prognosis – Vigilance – Emotion – Drive – Aggression.	
CHAPTER 11		77 - 86
	ASSESSING THE RETURN OF SENSATION	
	Visual Function – Auditory Function – Tactile Function.	
CHAPTER 12		87 - 97
	ASSESSING THE RETURN OF MOTOR OUTPUT	
	Motor Assessments – Hand Function – Vocalization – Swallowing.	

SECTION D	HOW THE BRAIN FUNCTIONS	98
CHAPTER 13		99 - 102
	SOME RULES OF BRAIN FUNCTION	
	The Stimulus-Response Mechanism – The Processing of Information – Rules of Brain Function 1-18.	
CHAPTER 14		103 - 110
	MORE ON HOW THE BRAIN WORKS	
	Functional Systems – Unique Human Functional Systems – The Organisation the Brain – The Fish Brain – The Reptilian Brain – The Mammalian Brain – The Human Brain – The Sensory Discrimination – The Motor Discrimination – The Brain Policy Makers – The Executive – The Workers – Rules 19-22.	
CHAPTER 15		111 - 117
	THE PATHWAY OF RECOVERY	
	The Concept of Canalisation – The Intrinsic Drive – The Fixed Pathway – Stages of Creativity – Fine Discrimination – Coarse Discrimination – Localisation – Localised Withdrawal – Reflex Generalised Withdrawal – No Response.	
CHAPTER 16		118 - 120
	THE SPARE CAPACITY OF THE BRAIN	
	Common Spare Capacities – The Hydrocephalics – The Microcephalics.	
CHAPTER 17		121 - 126
	THE REORGANISATION OF THE BRAIN	
	The Plasticity of the Brain – Reorganisation of the Normal Brain – Does the Injured Brain Reorganize if the Environment is Changed? – The Importance of the Effective Stimulus in the Patient in Coma – The Critical Time to Start Work on the Patient with Severe Brain Injury – The Critical Level of Input.	
SECTION E	THE THERAPY	127
CHAPTER 18		128 - 139
	WHAT TO DO IN THE UNCONSCIOUS AND UNRESPONSIVE PATIENT	
	Introduction – Stage 1 Programme for Vision – Stage 1 Programme for Hearing – Stage 1 Programme for Touch – Stage 1 Programme for Joint and Muscle Movement – Stage 1 Programme for Vestibular Stimulation – Aims – State of Response – Stimulus Used – Method and Timing of Application – Duration and Frequency – Contraindications – Setting up the Programme – The Cycles.	
CHAPTER 19		140 - 144
	WHAT TO DO IN THE UNCONSCIOUS AND RESPONSIVE PATIENT – VISION	
	Stages 2, 3, 4, 5 – Aims – State of Response – Stimulus Used – Method and Timing of Application – Duration and Frequency – Contraindications – Setting up the Programme.	

CHAPTER 20 **145 - 147**

**WHAT TO DO IN THE UNCONSCIOUS AND RESPONSIVE
PATIENT – AUDITORY**

Stages 2, 3, 4, 5 – Aims – State of Response – Stimulus Used – Method and Timing of Application – Duration and Frequency – Contraindications – Setting up the Programme.

CHAPTER 21 **148 - 151**

**WHAT TO DO IN THE UNCONSCIOUS AND RESPONSIVE
PATIENT – TOUCH**

Stages 2, 3, 4, 5 – Aims – State of Response – Stimulus Used – Method and Timing of Application – Duration and Frequency – Contraindications – Setting up the Programme.

CHAPTER 22 **152 - 162**

**WHAT TO DO IN THE UNCONSCIOUS AND RESPONSIVE
PATIENT – MOTOR OUTPUT**

The Importance of Movement – The Regaining of Motor Function – The Patient with No Movement or with Reflex Movement – The Patient Out of Coma with No Movement or Reflex Movement – The Patient Out of Coma with Spontaneous Movement or Controlled Movement – The Importance of the Central Axis – The Position of the Head – Moving the Central Axis – The Legs – Protecting the Central Axis – The Arms – Hand Function – The Grasp Reflex – The Grasp Release – The Prehensile Grasp – The Pincer Grasp – Speech – Feeding.

SECTION F **PROLONGED COMA** **163**

CHAPTER 23 **164 - 172**

**PROLONGED COMA – THE PERSISTENT VEGETATIVE STATE –
THE LOCKED-IN STATE**

Definition of Persistent Vegetative State – The Incidence of PVS – Is it Possible to Identify PVS Accurately? – The Effect of the Diagnosis of PVS on the Patient, Relatives, Profession – How the System Deals with the PVS Patient – What Should be the Approach – The Diagnosis – The Management – The Trial of Arousal – The Definition of the Locked-In State – The Approaches to the Patient in the Locked-In State.

SECTION G **OTHER IMPORTANT INFORMATION** **173**

CHAPTER 24 **174 - 178**

**ASPECTS OF THE TRADITIONAL MANAGEMENT AND THE OUTCOME
OF SEVERE BRAIN INJURY**

The Importance of Early Resuscitation – Survival and General Outcome – Function and Outcome.

CHAPTER 25 **179 - 181**

HOW DOES THE PATIENT FEEL?

The Approach to the Relative – The Recollections of the Patient – The Inadvertent Remarks – The Failure to Help – The Factors of Importance.

CHAPTER 26		182 - 189
	HOW DO THE RELATIVES COPE?	
	Reality – The Reality of the Patient – Reality for You – Mental Resources – Self-talk – Other People's Talk – Visualisation – Meditation – Forgiveness – The Importance of the NOW – Physical Wellbeing – Social Wellbeing – Spiritual Growth – Faith – Hope – Love – Failure – Conclusion.	
CHAPTER 27		190 - 197
	WHAT MAY BEAT YOU IN THE SYSTEM AND HOW TO DEAL WITH IT	
	The Background to the Medical System – The Severely Brain-injured and the System – Time – Place – People – Dealing with the Physician – Medical Ethics and Informed Consent – Other Organisations.	
CONCLUSION		198 - 202
	The Caring Professions and the Patient – The Caring Professions and the Relatives – To the Relatives and Friends – The Reason for Writing – The Moral Problems.	
APPENDIX 1	WHAT OTHERS HAVE SAID ABOUT THIS BOOK	203
APPENDIX 2	THE RESULTS OF A COMA CARE FAMILY SURVEY	205
AUTHOR INDEX		207
SUBJECT INDEX		208
